January 1986

Tabular layouts of article characteristics for bolts, pins, rivets, and keys

DIN
4000
Part 9

Sachmerkmal-Leisten für Bolzen, Stifte, Niete, Splinte, Paßfedern,
Keile und Scheibenfedern

1 Field of application

This standard specifies tabular layouts, in accordance with DIN 4000 Part 1, for standardized and non-standardized bolts, pins, rivets, and keys.

2 Tabular layouts

The following fasteners are covered here, grouped according to the corresponding tabular layout number:

Tabular layout no. 1: Bolts and pins
(cf. subclause 3.1)

Tabular layout no. 2: Stud bolts
(cf. subclause 3.2)

Tabular layout no. 3: Rivets
(cf. subclause 3.3)

Tabular layout no. 4: Split pins and spring cotters
(cf. subclause 3.4)

Tabular layout no. 5: Parallel keys, taper keys and Woodruff keys
(cf. subclause 3.5)

Continued on pages 2 to 11

Standards referred to

DIN 4000 Part 1 Tabular layouts of article characteristics; concepts and principles
 See standards listed in appendix A.

Previous editions

Supplement 1 to DIN 4000 Part 9: 10.77;
 DIN 4000 Part 9: 10.77.

Amendments

The following amendments have been made to the October 1977 edition and Supplement 1 to DIN 4000 Part 9, October 1977 edition.

- a) The information contained in the Supplement has been incorporated into this standard as appendix A.
- b) A number of illustrations has been added taking into account revised and new standards.
- c) Tabular layout no. 4 has been extended to include additional characteristics.
- d) The standard has been editorially revised.

Explanatory notes

The number of places available for each characteristic used in a tabular layout is specified in the table below, which has been taken from DIN 4000 Part 1.

Code letter Tabular layout no.	A	B	C	D	E	F	G	H	J	
	Maximum number of places per code letter (column)									Σ
1	5	6	5	4	3	8	4	15	15	65
2	5	6	5	5	4	3	8	15	15	66
3	5	5	6	4	3	4	5	15	15	70
4	8	5	10	6	4	1	1	15	15	65
5	3	3	5	2	2	1	3	15	15	49

The number of places specified for each code letter represents the shortest possible entry which can be made for any item in an article characteristics list.
